THE STATE FAIR.

Gala day.
Running races.
Extra attractions.
'Rah for the Fair.
Indian pony race.
Splendid weather.
Balloon ascension.
Music by the band.
Grand stock parade.
Stanford's Holsteins.
The three-minute class.
More stalls are necessary.
Fast trotting by Wallace G.
All for the Comstock miners.

BREVITIES.

The Pavilion is lovely.
Glorious weather again.
The hotels are crowded.
Reno is now in her glory.
Hon. T. B. Kliskey is here.
And still the people crowd in.
Nick Freyer, of Paradise, is in town.
John M. Dormer, of Carson, is here.
Senator Foley has returned from the Bay.

C. F. Bicknell, of Carson, is taking in the Fair.
The public schools are all closed for the week.
Reno looks beautiful to the visiting strangers.

Judge Spencer, of Susanville, is taking in the Fair.
Will somebody buy a Cleveland Bay for the Journal?

The Washoe farmers should buy some of the fine stock.
W. W. Sawyer drove up from Wadsworth yesterday.

Hon. W. J. Westerfield, of Dayton, is taking in the Fair.
The Fair train brought down ninety visitors yesterday.

I. H. Bowers, an old-time miner, is taking in the Reno Fair.
Marshall Robinson and wife, of Carson, came down yesterday.

Miss Dottie McCone, of Virginia, is again visiting Reno friends.
Charles Chenoweth departed for Humboldt county Monday morning.

B. F. Dayton, Dr. Collins and Cub. Hall, of Virginia, came in yesterday.
Double season tickets have been reduced to \$5 and single ones to \$4.50.

The Indian school at the Pyramid Agency opened with a good attendance.
Joseph Powning, of San Francisco, was called home on business Sunday night.

Wm. Bowen and Lincoln Parker, of Theresa, N. Y., are visiting the Reno Fair.
Prof. A. H. Willis, Dr. Webber and A. Hannak, of Virginia, came down yesterday.

It is reported that Sam. Treffy has sold his paper, Prince, to D. Curcio, of Carson, for \$1,100.
The old building that has been standing on Plaza street in front of the new opera house, is being removed.

Visitors are streaming in from every direction. The Fair will be the finest ever known in the history of the State.
Travis Jones and family, of Waco, Tex., passed through Reno Sunday night on their way to the Golden State.

Ell Hirsfield, clerk at the Pyramid Reservation, is visiting Reno. He reports everything at the Agency in fine shape.
George Russell's children are driving a curiosity through town in the shape of a little horse attached to a thoroughbred dog cart.

To-morrow will be another great day at the track. Carson will send down the town, and Reno will also suspend business.
Senator Stanford's herd of Holsteins, 22 in number, came up from Sacramento yesterday. They are a magnificent lot of animals.

Reno and Nevada to the front and our business men, farmers and stock men, first, last and all the time, is the motto of the JOURNAL.
Wallace Scholl, of Dry Valley, and one of the first settlers in Reno, is here looking at the improvement that has taken place and watching the races.

The preliminary examination of Raphael Beanco for murder, was begun at Austin Saturday, in the Justices' Court. The State has seven witnesses.
The theater-going public who wish to see Hazel Kirke to-night by the Webster-Brady Co., had better secure their seats immediately for the seats are nearly all sold out already.

Gas Webber, who had charge of a force of men on the Curtis ore dump for the Manhattan Company at Austin, fell dead at his home, while eating supper, from hemorrhage of the lungs on Friday evening, between 6 and 7 o'clock. He leaves a wife and three children.

Isaac N. Woodhouse was 42 years of age, a native of Mansfield, O., and served in the Sixth Ohio Battery during the late war. He was a hard working, temperate man and was not in debt or in trouble with any one. The friends of the missing man are organizing for a thorough search of the country where he was last seen alive. His brother J. J. Woodhouse, lives at 1428 Twenty-first street, San Francisco.

NEVADA.

Its Soil, Climate and General Resources.

A State That Will Never Wear Out, But Like the Old Jordan Valley Will Furnish Food for the Millions.

There could be no time more fitting for directing the attention of the people to the natural wealth of the State and the causes thereof, than the time of our Annual Fair. These matters, with others similar, are particularly before us, and our attention, because of surroundings, is directed in like channels. Much of the larger part of the State is within the Great Basin—so termed. Each continent has its basin or basins. Asia in particular has its basins. It is not the intention to describe these basins, but to direct attention to one or two of them and their past and present conditions for the purpose of illustrating and showing by comparison the natural wealth of the soil of our State. The basin of the Jordan in Asia, is best known and most noted in history. We have a clear and full description of this basin, and results of its natural soil wealth for not less than thirty-five hundred years. The rocks in the basin of the Jordan, like the rocks in our State, are highly mineralized. The climate is dry and irrigation is necessary. No part of the earth sustained so large a population to the square mile from the beginning to the Christian Era, as the Jordan Basin, except the Valley of the Nile in Egypt, which has been enriched each succeeding year by alluvial deposits from the Nile. The soil of the Jordan Basin, like the soil of our basin, has received little if any addition from alluvial deposits, therefore the source and cause of the wealth of its soil as well as the source and cause of the wealth of our soil, must be elsewhere than in alluvial deposits. The source of the wealth and durability of the soil in the Jordan Basin is in the mineral properties of its rocks, and the cause of its wealth is the thoroughly decomposed condition the soil was and is in. The Jordan Basin, like our basin, is the bed of an ancient sea. All the waters in the Valley and surrounding mountains center in Lake Asphaltites, so appropriately called "Dead Sea." The Jordan deposits in this sea each second of time six and one-half bushels of salt, which shows the Jordan Basin contains some minerals that are abundant in our basin. There are authentic historical accounts of the vitality of the Jordan Basin fifteen hundred years before the Christian Era. It then produced grapes and other fruits in abundance, of superior quality, and such was the growth and development of the grape that it required two men to carry a bunch, and from that time to the present, no place is known to have excelled, when properly cultivated, the mountain slopes of the Jordan Valley in the production of grapes and wine. California is taking position as a grape-growing and wine-producing country, which position it will continue to maintain, not because of its climate only, but because of the mineral properties abundant in its soil, which properties have been chiefly derived from the decomposed mineral rocks of the Sierra Nevada mountains that have the necessary properties for grape and other fruit development. The soil of Nevada contains all the mineral properties of the soil of California in abundance, and no State or Territory east or west of the basin, or country of the same area on the globe, has such properties in abundance and in such excellent form as the State of Nevada, and because of that fact Nevada is better adapted for the production of grains, grasses, fruits and other vegetables of the temperate zone than any known country of like surface. The time is at hand when the southern portion of Nevada and California, east of the Sierra Nevada range will develop grapes and other fruits superior to any fruit that has been or will be produced west of the range, and the more northern portions of the State will produce in quality and in quantity any of the hardy varieties of grapes and other fruits in excess of any part of the continent in similar latitudes east of the Sierra Nevada, and in quality will surpass California, but California will lead us in quantity in our more northern latitudes because of the mildness of her climate.

THE JORDAN BASIN.
Like the soil of our basin, has received little if any addition from alluvial deposits, therefore the source and cause of the wealth of its soil as well as the source and cause of the wealth of our soil, must be elsewhere than in alluvial deposits. The source of the wealth and durability of the soil in the Jordan Basin is in the mineral properties of its rocks, and the cause of its wealth is the thoroughly decomposed condition the soil was and is in. The Jordan Basin, like our basin, is the bed of an ancient sea. All the waters in the Valley and surrounding mountains center in Lake Asphaltites, so appropriately called "Dead Sea." The Jordan deposits in this sea each second of time six and one-half bushels of salt, which shows the Jordan Basin contains some minerals that are abundant in our basin. There are authentic historical accounts of the vitality of the Jordan Basin fifteen hundred years before the Christian Era. It then produced grapes and other fruits in abundance, of superior quality, and such was the growth and development of the grape that it required two men to carry a bunch, and from that time to the present, no place is known to have excelled, when properly cultivated, the mountain slopes of the Jordan Valley in the production of grapes and wine. California is taking position as a grape-growing and wine-producing country, which position it will continue to maintain, not because of its climate only, but because of the mineral properties abundant in its soil, which properties have been chiefly derived from the decomposed mineral rocks of the Sierra Nevada mountains that have the necessary properties for grape and other fruit development. The soil of Nevada contains all the mineral properties of the soil of California in abundance, and no State or Territory east or west of the basin, or country of the same area on the globe, has such properties in abundance and in such excellent form as the State of Nevada, and because of that fact Nevada is better adapted for the production of grains, grasses, fruits and other vegetables of the temperate zone than any known country of like surface. The time is at hand when the southern portion of Nevada and California, east of the Sierra Nevada range will develop grapes and other fruits superior to any fruit that has been or will be produced west of the range, and the more northern portions of the State will produce in quality and in quantity any of the hardy varieties of grapes and other fruits in excess of any part of the continent in similar latitudes east of the Sierra Nevada, and in quality will surpass California, but California will lead us in quantity in our more northern latitudes because of the mildness of her climate.

THE ANSWER.
Is written on every hillside and in most of the valleys of the State—insufficiency of water for irrigation. Never despair of the future of our State because we have not sufficient water on the surface for much of the land within our borders, or because the rains are dried up before they reach our lands and waste places? Were our energetic force and brain power dried up as the rains are dried up, we could face a world of opposition to our inactivity and want of resolution, but with muscular power and brain power unsurpassed because of health giving surroundings and climatic stimulus, we are equal to the work of overcoming any natural obstacle intervening between us and the water necessary for irrigation. Our minds have not been directed to this subject with a formed purpose to overcome difficulties and remove obstacles in the way of water supply—when we understand the subject and conclude to have water, neither sand-bars nor rocks will prevent us from obtaining it. The waters of the Sierra Nevada could be and will be harnessed in the near future by the erection of dams and dikes at small cost compared with benefits bestowed in quantities sufficient for the irrigation of every foot of land subject to the flow of these waters. The waste of water as it now flows in the natural channels is such that under the arrangement of nature about all the lands are under cultivation that can be irrigated, but instead of feeling depressed because of our environment, we should feel pleased that we have appropriated and applied all that nature's ways will allow us to appropriate and apply unless we go to her aid, which aid we are able and ready to furnish in our own interests and the interests of unimprovement, cultivation and progress, for "there is no such word as fail" in the vocabulary of the human race.

THE EASTERN SLOPE.
Of the Sierra Nevada is a large territory of itself, but when compared with the State, is small. Nevada has to be redeemed, so the work is as broad as the State. The question then arises. Are we as large as the work? We may not be able to answer in the affirmative, but we can answer in all confidence, that we are large enough to begin the work and know enough to make an intelligent beginning, and that beginning will be half way toward accomplishment. When a beginning is made new aid will thereafter continue to flow upon us in the form of energetic men, who will be seeking homes in a State abundant in all the wealth of nature for home making. Money will not be looking where there is natural wealth and energy and intelligence directing the work of improvement.

The French, in aid of order and government, between the years 1866 and 1878, sunk in the closed basin of Hodra and in the desert part of the province as many as one hundred and fifty-six wells yielding about sixty thousand gallons a minute, and notwithstanding over two hundred thousand palms, besides apricot, peach, pomegranate and orange trees, the branches of which are loaded with fruit in their season. Under the shade of these trees corn, wheat and barley ripen, and lower still, the modest trefoil fills up the smallest intervals of the former desert soil.

THE DECOMPOSITION OF LIKE ROCKS.
The decomposition of like rocks had furnished to the soil those properties necessary for the production of the fine wheat crops of the Jordan. Notwithstanding the lapse of three thousand years since the building of the first temple, these properties are as active now as then, in the production of wheat.

WHEREVER WHEAT IS NOW GROWN.
In the country the yield, with proper care, is all that could be hoped for. From these few facts, for there are many other facts, we are able to arrive at a correct conclusion upon the durability and capacity of the soil of our basin for wheat culture, and more especially are we able to arrive at a correct conclusion when we know there is not a wheat food property in the soil of the Jordan basin that is not possessed by the State of Nevada in quantity. No country in the history of the world has given such proofs of ability for sustaining large herds of cattle, sheep and goats as the land of Palestine. Its pastures and herds were thomes of Israel's poets. Its herds were the prize of invading armies, and the land that flowed with milk and honey was ever defended to the death by its inhabitants from the beginning. We also have authentic historical evidence and proofs of quarrels and contentions among its cattle and sheep men four thousand years ago over their pastures and ranges, as we now have authentic evidence and proofs of quarrels and contentions among the cattle and sheep men of Nevada over their pastures and ranges. These matters are proofs of the value of the lands of both basins for pasture, and of the natural wealth of the soil. There is no country in modern times that has given such proofs of natural soil wealth as Nevada has given for the production of grasses possessed of fat making properties, and so far as history informs us, there is in the Nevada basin a counterpart of the basin of the Jordan in soil, wealth and capacity for production, and there is also a counterpart in the matter of differences in our stock men over their ranges with the differences of the stock men of Palestine over their ranges. No other countries down to a fighting quantity have given, or can give, like proofs upon comparison, of sameness and completeness in natural soil wealth as the basin of the Jordan and that of Nevada, yet not with these incontrovertible evidences of our soil wealth, many of our people despair of the future of our State and look upon it as a waste of nature's wilderness, and why so?

THE ANSWER.
Is written on every hillside and in most of the valleys of the State—insufficiency of water for irrigation. Never despair of the future of our State because we have not sufficient water on the surface for much of the land within our borders, or because the rains are dried up before they reach our lands and waste places? Never despair of the future of our State because we have not sufficient water on the surface for much of the land within our borders, or because the rains are dried up before they reach our lands and waste places? Were our energetic force and brain power dried up as the rains are dried up, we could face a world of opposition to our inactivity and want of resolution, but with muscular power and brain power unsurpassed because of health giving surroundings and climatic stimulus, we are equal to the work of overcoming any natural obstacle intervening between us and the water necessary for irrigation. Our minds have not been directed to this subject with a formed purpose to overcome difficulties and remove obstacles in the way of water supply—when we understand the subject and conclude to have water, neither sand-bars nor rocks will prevent us from obtaining it. The waters of the Sierra Nevada could be and will be harnessed in the near future by the erection of dams and dikes at small cost compared with benefits bestowed in quantities sufficient for the irrigation of every foot of land subject to the flow of these waters. The waste of water as it now flows in the natural channels is such that under the arrangement of nature about all the lands are under cultivation that can be irrigated, but instead of feeling depressed because of our environment, we should feel pleased that we have appropriated and applied all that nature's ways will allow us to appropriate and apply unless we go to her aid, which aid we are able and ready to furnish in our own interests and the interests of unimprovement, cultivation and progress, for "there is no such word as fail" in the vocabulary of the human race.

THE ANSWER.
Is written on every hillside and in most of the valleys of the State—insufficiency of water for irrigation. Never despair of the future of our State because we have not sufficient water on the surface for much of the land within our borders, or because the rains are dried up before they reach our lands and waste places? Were our energetic force and brain power dried up as the rains are dried up, we could face a world of opposition to our inactivity and want of resolution, but with muscular power and brain power unsurpassed because of health giving surroundings and climatic stimulus, we are equal to the work of overcoming any natural obstacle intervening between us and the water necessary for irrigation. producing qualities of the Jordan Basin. The decomposition of like rocks had furnished to the soil those properties necessary for the production of the fine wheat crops of the Jordan. Notwithstanding the lapse of three thousand years since the building of the first temple, these properties are as active now as then, in the production of wheat.

WHEREVER WHEAT IS NOW GROWN.
In the country the yield, with proper care, is all that could be hoped for. From these few facts, for there are many other facts, we are able to arrive at a correct conclusion upon the durability and capacity of the soil of our basin for wheat culture, and more especially are we able to arrive at a correct conclusion when we know there is not a wheat food property in the soil of the Jordan basin that is not possessed by the State of Nevada in quantity. No country in the history of the world has given such proofs of ability for sustaining large herds of cattle, sheep and goats as the land of Palestine. Its pastures and herds were thomes of Israel's poets. Its herds were the prize of invading armies, and the land that flowed with milk and honey was ever defended to the death by its inhabitants from the beginning. We also have authentic historical evidence and proofs of quarrels and contentions among its cattle and sheep men four thousand years ago over their pastures and ranges, as we now have authentic evidence and proofs of quarrels and contentions among the cattle and sheep men of Nevada over their pastures and ranges. These matters are proofs of the value of the lands of both basins for pasture, and of the natural wealth of the soil. There is no country in modern times that has given such proofs of natural soil wealth as Nevada has given for the production of grasses possessed of fat making properties, and so far as history informs us, there is in the Nevada basin a counterpart of the basin of the Jordan in soil, wealth and capacity for production, and there is also a counterpart in the matter of differences in our stock men over their ranges with the differences of the stock men of Palestine over their ranges. No other countries down to a fighting quantity have given, or can give, like proofs upon comparison, of sameness and completeness in natural soil wealth as the basin of the Jordan and that of Nevada, yet not with these incontrovertible evidences of our soil wealth, many of our people despair of the future of our State and look upon it as a waste of nature's wilderness, and why so?

FIRST ANNUAL FAIR

—OF—

Humboldt Agricultural Association

DISTRICT NO. 3,

—WILL BE HELD AT—

Winnemucca, - - Nev.

Commencing October 12th and
Ending October 15th!

\$5,000 00

In Purses and Premiums!

Liberal Premiums

FOR LIVE STOCK DEPARTMENT!

GRAND

BASE BALL TOURNAMENT

For Championship of State, prize, \$300 00 and Trophy—Ball and Bat.

FIRST DAY—Wednesday, October 12th

FIRST RACE—Hunting—Purse \$250, one-half mile and repeat, free for all three-year-olds raised and owned in Humboldt county, first horse \$175, second, \$75.

SECOND RACE—Running—Purse \$300, free for all, one mile and repeat, first horse \$225, second, \$75.

THIRD RACE—Trotting—Purse \$150, mile heats, two in three, free for all stallions raised and owned in Humboldt county, first horse, \$100, second, \$50.

SECOND DAY—Thursday, October 13th

FIRST RACE—Trotting to harness—Purse \$200, mile heats, two in three, free for all horses raised and owned in Humboldt county, first horse, \$150, second, \$50.

SECOND RACE—Running—Purse \$100, one-half mile dash, free for all, first horse, \$75, second, \$25.

THIRD RACE—Running—Purse \$200, single dash of a mile, free for all, first horse, \$150, second, \$50.

THIRD DAY—Friday, October 14th

FIRST RACE—Running—Purse \$150, one-half mile dash, free for all two-year-olds raised and owned in Humboldt county, first horse, \$100, second, \$50.

SECOND RACE—Trotting—Purse \$100, mile heats, two in three, free for all, first horse, \$75, second, \$25.

THIRD RACE—Running—Purse \$150, one-half mile dash, free for all, first horse, \$100, second, \$50.

FOURTH DAY—Saturday, October 15th

FIRST RACE—Running—Purse \$150, one-half mile dash, free for all saddle horses, first horse, \$75, second, \$25, third, \$25.

SECOND RACE—Running—Purse \$100, mile heats, two in three, free for all, first horse, \$75, second, \$25, third, \$25.

THIRD RACE—Trotting to harness—Purse \$200, mile heats, two in three, free for all, first horse, \$150, second, \$50, third, \$50.

Unless otherwise specified, the entrance will be 15 per cent of the purse or premium completed for.

REMARKS.

First—In all cases, any horse distancing the field will receive only first money.

Second—No money will be paid to any race without a contest.

Third—All entries are to be made by ten o'clock the night before the race is to be run.

Fourth—In all cases four or more to enter, three or more to start.

Fifth—National Trotting Association Rules to govern trotting, and Pacific Coast Blood Association to govern running races.

Sixth—All entries must be directed to E. S. ARCHER, Secretary, Winnemucca, Nevada.

ENTRANCE TO RACE TRACK.

Each person, 25 cents; each team, 50 cents, each horseman, 50 cents.

250 Beautiful Lots For Sale!

A RARE CHANCE FOR INVESTMENT AND A HOME

THE MOST LOVELY PORTION OF RENO.

Facing the Truckee—The Aristocratic Riverside Avenue Driveway—Splendid Sewerage—Healthy Location and Safe From Fire.

The proprietor is now ready to receive proposals for lots in Powning's Addition. The map gives a good idea of the Tract, which is situated between the Central Pacific Railroad and the Truckee River, and commences on the west at a point three blocks distant from Virginia Street, making it the most central and convenient of any portion of the rapidly growing town of Reno. Unlike any other part of the town this Addition faces the beautiful Truckee River and Riverside Avenue is certain to become the fashionable driveway of the country. The streets are 80 feet wide, while Riverside and Keystone Avenues are intended to be 100 feet in width. All alleys are 20 feet wide. The soil is a rich gravelly loam, and susceptible of the highest state of cultivation. Being situated as it is it is more safe from fire than any other section. The regular lots are 50x140 feet. The sewerage is perfect.

Before Buying Elsewhere Parties will do Well to Look at These Lots.

RENO!

Is the Railroad Center of Nevada

RENO

Is the Educational Center of Nevada.

RENO

Is the Healthiest Town in Nevada.

RENO

Is Great, and Alfalfa is King!

RENO

Has no equal in Nevada or California for salubrity of climate, wealth of soil, diversity of products and stability. Situated in the very heart of the celebrated Truckee Meadows the future of Reno is assured. Reno is the City of Homes. There is not a house to rent in Reno. New buildings are occupied as fast as erected. Reno has advantages which no other town can equal. The climate is mild and genial in Winter, and even and healthful in Summer. There are no excessively heated or severely cold terms, and while the days may be warm in Summer the nights are deliciously cool; in Winter sleigh-riding is the exception and not the rule. Facilities for irrigating surpass any in the State, and there is no failure of crops. Reno has Churches of all denominations, Bishop Whitaker's School for Girls, Mt. St. Mary's Academy, the State University, and splendid Public Schools. The Reno Water Co. furnishes ample pure, cold water for all purposes. The Reno Electric Light Co.'s electric light system, already well established, is being aug-

RENO

mented. The Reno Gas Co. supplies gas for all purposes. The streets of Reno are lighted by electricity. Reno's geographical position is excellent. It is on the line of the Central Pacific Railroad, only 154 miles from Sacramento, and 244 miles from San Francisco. It is the terminus of the Virginia and Truckee Railroad running south, and of the Nevada and California Railroad running north. It has two Flouring Mills, Planing Mills, three Nurseries, a Soap Factory, Reduction Works, and other industries. A great Woolen Mill and a Sash, Door, Blind and Box Factory, are about to be established. Reno has the Bank of Nevada with \$300,000 capital, and the First National Bank with \$100,000 capital. It has two fine papers in the DAILY and WEEKLY NEVADA STATE JOURNAL and the Daily and Weekly Gazette. Reno is the natural home of the Alfalfa, and therefore the great cattle headquarters of the State. Here are fed the prime beef for the California market. Reno potatoes are the best in the world, and she also excels in Strawberries and the small fruits. Reno Wheat took the first prize at the great New Orleans Exposition. The State Fair is always held at Reno. Reno is the County Seat of Washoe County, the wealthiest county in Nevada.

LEGAL.

BOARD OF EQUALIZATION.

OFFICE OF THE COUNTY CLERK,
WASHOE COUNTY, NEVADA,
RENO, NEVADA, Sept. 12, 1887.

NOTICE IS HEREBY GIVEN THAT THE County Assessor of Washoe County, Nevada, has completed the Tax list or Assessment Roll for A. D. 1887, and has duly attached his certificate thereto and delivered it and the Map Books and all original lists of property given to him, to the Clerk of the Board of County Commissioners; that the Board of County Commissioners will meet on Monday, September 19, 1887, as a Board of Equalization, and will hear and determine all complaints made in regard to the assessed value of any property within said county, and will change and correct any valuation, either by adding thereto or deducting therefrom, if they deem the same fixed in the Assessment Roll either above or below the true value, whether said sum was fixed by the owner or Assessor, except that in case where the person complaining of the assessment has refused to give the Assessor his list under oath as required by law, in such case no reduction will be made by the Board of Equalization in the assessment made by the Assessor.

The Assessment Roll will be kept open for public inspection at the County Clerk's office until after adjournment of the Board of Equalization.

The Board of Equalization will continue in session from time to time, until the business of equalization is disposed of, but no session will not sit after the first Monday of October, 1887; except that the Board of Equalization will meet to consider the Assessment Roll and hear complaints in exceptional cases mentioned in the Revenue Law, Section 1091, General Statutes of Nevada, and the north 1/4 of Section 7, Township 18, north of Range 18 east, M. D. B. and M. Public notice is hereby given that I will on the

SHERIFF'S SALE.

J. H. WALLACE
VS.
A. KINSHER.

BY VIRTUE OF AN EXECUTION ISSUED out of the Justice's Court of Reno Township, Washoe County, Nevada, wherein J. H. Wallace, Plaintiff, vs. A. Kinsher, Defendant, upon a judgment rendered on the 20th day of January, A. D. 1887, for the sum of three hundred and no cents and no/100ths of a cent, with costs and interest, I have this day levied upon all the right, title, claim and interest of said defendant, A. Kinsher, of, in and to the following described real estate, to-wit: The east 1/4 of the northeast 1/4, the west 1/4 of the southeast 1/4, and the north 1/4 of the northwest fractional 1/4 of Section 7, Township 18, north of Range 18 east, M. D. B. and M. Public notice is hereby given that I will on the

Fifth Day of October, A. D. 1887,
At 1 o'clock P. M. of said day, in front of the Court House door of the County of Washoe, sell at public auction for United States gold coin, all the right, title, claim and interest of said defendant, A. Kinsher, of, in and to the above described property, or so much thereof as may be necessary to raise sufficient to satisfy said judgment with interest and costs, etc., to the highest and best bidder. L. J. FLINT,
Dated Sept. 30, A. D. 1887. Sheriff.

ASSESSMENT NOTICE.

WESTERN NEVADA GOLD AND SILVER
Mining Company. Principal place of business, Reno, Nevada; location of works, Peavine District, Washoe County, Nevada. Notice is hereby given that at a meeting of the Board of Trustees of the above entitled Western Nevada Gold and Silver Mining Company, held on the 20th day of August, A. D. 1887, an assessment of one-half (1/2) cent per share was levied upon each and every share of the capital stock of said Western Nevada Gold and Silver Mining Company. Said assessment is payable immediately to the Secretary of the company, at the office of the company, in the store of C. Coleman. All shares of said stock upon which the assessment is unpaid prior to the

20th day of September, A. D. 1887
Will be deemed delinquent and will be advertised as such, and if not paid before the 20th day of October, A. D. 1887, will be sold, or as much thereof as may be necessary to pay such assessment, together with the cost of advertising and expenses of sale.

C. COLEMAN,
Secretary Western Nevada G. and S. M. Co.
